

EQUIPMENT SELECTION GUIDE

34 FT BUCKET TRUCKS / VANS

These units are designed for telecommunications, lighting, sign maintenance and electrical work. Our rental fleet includes insulated and non-insulated Versalift aerial lifts

45-50 FT BUCKET TRUCKS

These units are designed for telecommunications, lighting, sign maintenance and electrical work. Our rental fleet includes insulated Versalift aerial lifts on Ford F-550 or Ram 5500 sized chassis. Available with and without a material handler and with or without outriggers.

55-65 FT BUCKET TRUCKS

These units are designed for electric utility work, lighting, sign maintenance and forestry work. Our rental fleet includes insulated Versalift aerial lifts. Utility bodies, flat beds, rear mounts, 4x4s, double buckets, over center, and material handlers are available upon request.

60-80 FT FORESTRY PACKAGE

These units are designed for forestry work, storm work and line clearing. These units are configured with an over-center Versalift aerial bucket and a forestry dump chip box. Some units available with an elevator for extra reach.

71-85 FT BUCKET TRUCKS

These units are designed for electric utility work, lighting, sign maintenance and forestry work. Our rental fleet includes insulated Versalift aerial lifts. Utility bodies, flat beds, rear mounts, 4x4s & 6x6s, double buckets, over center, and material handlers are available upon request.

86-100 FT BUCKET TRUCKS

These units are designed for electric utility work, lighting, sign maintenance and forestry work. Our rental fleet includes insulated Versalift aerial lifts. Utility bodies, flat beds, rear mounts, 4x4s & 6x6s, double buckets, over center, and material handlers are available upon request.

101 FT PLUS BUCKET TRUCKS

These units are designed for electric utility work, lighting, sign maintenance and forestry work. Our rental fleet includes insulated and non-insulated aerial lifts made by Versalift, Condor, Ruthmann and other manufacturers.

45-50 FT SHEAVE HEIGHT DIGGER DERRICKS

These units are designed for electric utility work, telecommunications, lighting, sign maintenance. Our rental fleet includes insulated Versalift digger derricks as well as other manufacturers. Rider seat, heel winch, tip winch, capstan drive, pole racks, 4x4 upper bucket and controls, and tracked carriers are available upon request.

60-70 FT SHEAVE HEIGHT DIGGER DERRICKS

These units are designed for electric utility work, telecommunications, lighting, sign maintenance. Our rental fleet includes insulated Versalift digger derricks as well as other manufacturers. Rider seat, heel winch, tip winch, capstan drive, pole racks, 4x4 upper bucket and controls, and tracked carriers are available upon request.

BACK YARD DIGGER DERRICK AND AERIAL BUCKETS

These units are designed for electric utility work, telecommunications, forestry and storm work. These compact units are designed to fit through a gate in order to reach areas that are not accessible by a truck or larger carrier. Mounted on these carriers are 45' aerial buckets and 45' sheave height digger derricks.

CABLE PLACER / STRINGER - UNDER CDL

Designed for cable installation and maintenance, with a reach of 40' - 45', these units are configured with a self-loading reel carrier with a winder and brake. Our rental fleet includes Versalift units mounted on under CDL chassis.

TRUCK MOUNTED CRASH ATTENUATORS

These units are designed to protect and support any roadside workers. These units are designed to create a barrier between workers and any stray vehicles that may veer into a work zone. Our fleet includes Scorpion crash attenuators with Arrow Boards.

10-50 FT DEPTH PRESSURE DIGGER

These units are designed for electric utility work, telecommunications, lighting, sign maintenance and general construction work. Their low overhead clearance and short, maneuverable chassis make them perfect for intersections, sub stations and other tight work areas. These units are capable of drilling diameters of 8 to 72 inches in proper soil conditions. Full turntable and slide are available on all units. Our rental fleet includes units made by Texoma, Spiradrill and other manufacturers. Service winches, pole handlers, tracked mounts, guard rail pounders, 4x4, 6x4, 6x6 as well as tracked units are available upon request. All sizes of augers and tooling also available.

60 FT (UNDER CDL) SIGN CRANES

The large rotation work platform combined with heavy lifting capacities, make these units perfect for lighting, sign maintenance, electrical work and some forestry applications. Our rental fleet consists of Manitex and Elliott aerial lifts. Under CDL, 4x4s, insulated and non-insulated units are available upon request.

85 FT - 97 FT SIGN CRANES

The large rotation work platform combined with heavy lifting capacities, make these units perfect for lighting, sign maintenance, electrical work and some forestry applications. Our rental fleet consists of Manitex and Elliott aerial lifts. Single axle, tandem axle, 4x4s, 6x4s, 6x6s, insulated and non-insulated units are available upon request.

TRACKED CARRIER W/ 60-80 FT AERIAL BUCKET

These units are designed for electric utility work, telecommunications and storm work. These carriers are designed for off road applications and extremely difficult terrain. Mounted on these carriers are 60' - 80' aerial buckets. Our rental fleet includes insulated Versalift aerial lifts mounted on carriers from various manufacturers.

TRACKED CARRIER W/ 45-70 FT SHEAVE HEIGHT DIGGER DERRICK

These units are designed for electric utility and storm work. These carriers are designed for off road applications and extremely difficult terrain. Mounted on these carriers are 60' - 70' sheave height digger derricks. Our rental fleet includes insulated digger derricks from Versalift and other manufacturers.

PULLERS/TENSIONERS

These units are designed for electric utility construction. Our rental fleet includes single and multi-drum pullers and tensioners from various manufacturers.

POLE TRAILERS & REEL TRAILERS

These units are designed for electric utility work, telecommunications, general pole line construction and lighting & sign maintenance work. Our rental fleet includes units from various manufacturers. Telescoping tongue, dual wheels, tandem axles, storage boxes and galvanized frame are available upon request.

BRIDGE INSPECTION UNITS

These units allow unrestricted access to many types of under bridge inspections and maintenance. These units range from 34' trailer mounted platform units to 70' bucket mounted units made by various manufacturers.
